Enel in the United States & Canada

Changing the face of energy
Enel: A growing green energy giant

Accelerating the Energy Transition: The focus on decarbonization and electrification

Enel is a multinational power company and a leading integrated player in the global power, gas and renewables markets. We are changing the face of energy as a shaper, leader and enabler of the energy transition.

Enel began as an energy utility over 50 years ago, but today we are not the company we once were. With a dedicated focus accelerating the energy transition through decarbonization and electrification, we have been listed on the Dow Jones Sustainability Index for 17 years and have been included on Fortune Magazine’s “Change the World” list (2015, 2017, 2018).

1st network operator¹
30 Countries

World’s largest player² in renewables

Largest retail customer base worldwide¹

70 M
Utility customers

Countries

~ 66,000
Employees

50 GW
Renewable capacity

7.4 GW
Demand response capacity

2050
The year by which Enel pledges to be carbon neutral

1. By number of customers. Publicly owned operators not included
2. By installed capacity. Includes managed capacity for 4.2 GW
3. Includes customers of free and regulated power and gas markets

Data as of 06/30/2021
Enel business

Global Power Generation

Accelerates a sustainable energy transition, increasing renewables capacity growth and decarbonizing our fleet

Global Infrastructure & Networks

Guarantees reliability and quality of service in the energy supply, through efficient, resilient and digital networks

Energy & Commodity Management

Optimizes the Group margin as a single portfolio, finding its best balance

Enel X

Enables the energy transition boosting electrification and decarbonization of customers, by providing innovative services and system flexibility

Retail

Increases customer value through commodities and “beyond commodities” services also thanks to customer satisfaction and experience improvement
Enel Green Power

Overview

North America’s fifth-largest wind and solar operator, Enel Green Power is at the forefront of integrating innovative technologies into renewable energy power plants. We are committed to growth and have more than doubled our managed capacity over the past five years.

60 renewable energy power plants for a total capacity of over 6.7 GW including wind, solar, and geothermal plants in the US & Canada.

Present in 14 US states, 1 Canadian province

Produced 20.0 TWh in 2020, enough energy to power 1.8 million households/year*

Created more than 3,500 construction jobs since 2016

5th largest renewable energy operator in the US**

$3B of capital investment to support growth of renewable capacity, with an average annual growth of 1 GW over the next three years.*

3rd Largest Seller of Renewable Energy to Corporate Customers*
